

People Incorporated was founded in 1969 on the belief that those living with mental illness could be ‘incorporated’ back into society, and society itself could be incorporated into efforts to support these individuals who are most vulnerable and in need of care. Since then, People Incorporated has been committed to supporting mental health and wellness in communities through collaboration, integration of care and training. The Training Institute of People Incorporated brings the experience of a leading mental health agency into delivering mental health training to communities. People Incorporated has evolved into the mental health care provider it is today – meeting people where they are at, assessing what kind of care they need and providing that care.

Navigating the System

People with mental health issues often find it **difficult to navigate the system** of available care. Additionally, many who need mental health or substance use disorder services, show up in other parts of our community services network where these specific services are not available. These situations **can cause many to fall through the cracks**.

What is CCBHC?

People Incorporated was chosen as one of six organizations in Minnesota to participate in a federal demonstration project called the Certified Community Behavioral Health Clinic (CCBHC). The CCBHCs are designed to provide a range of mental health and substance use disorder services to vulnerable individuals, **CREATING A “ONE-STOP INTEGRATED MODEL” FOR MENTAL HEALTH CARE**. This program is the largest investment in mental health and addiction care in generations, and allows People Incorporated to meet clients anywhere they need to be seen, eliminating the barrier of clients needing to only be seen in a licensed facility. The success of this “no walls model” is instrumental in guiding our commitment to Integrated Care across our programs and services, connecting us to vital partners in our community and in expanding our services for the future.

Central Access

Call **651.774.0011**, M-F, **7am – 5:30pm**, for live, answered calls. If calling after hours, you may leave a message to be contacted the following day. If looking for crisis services after hours, please follow the voice prompts to be connected to the crisis programs. If you are experiencing a mental health or medical emergency, the voice prompts will direct you to hang up and dial 911.

People Incorporated created CENTRAL ACCESS – a system to serve clients through live, answered calls that can assess and resource for the clients needs. This innovative solution takes the anxiety away and gives mental health workers and clients alike, a “BIG PICTURE” view of a client’s needs and care pathway, creating better context for decision-making and more sustainable solutions to care.

CENTRAL ACCESS 651.774.0011

System of Care

Your care team will ensure these services are being properly utilized and integrated:

- › 24-hour mobile crisis teams
- › Screening, assessment and diagnosis
- › Treatment planning and outpatient mental health services
- › Primary care screening and monitoring
- › Psychiatric rehabilitation
- › Outpatient chemical dependency services
- › Connections to other providers/systems such as criminal justice, foster care and more
- › Armed forces and veteran care
